Study programme title

Date of degree

(dd/mm/yyyy)

Experience with hydrological modelling and/or “researching research” with a focus on modelling (max. 1700 characters)

What is your experience with hydrological modelling?

What is your experience with “researching research” in relation to modelling, i.e. from the perspective of science and technology studies, political ecology or related field?

Experience in at least one of these two areas is important. We aim for a balanced group of participants across the two fields.
